

Drags Imun

- VIRAL DISEASES: RESPIRATORY INFECTIONS, HEPATITIS, HERPES
- SUPERFICIAL WOUNDS OF ALL TYPES
- INFLAMMATORY BOWEL DISEASE, DIARRHEA
- SUPPORT FOR THE BODY'S DEFENSE SYSTEM
- MYCOSES, SKIN RASHES, INSECT BITE REACTIONS

This product has been approved as a dietary supplement. It is not a medicine and should not be confused with prescribed medicines, nor does it have approved medicinal effects.

Drags Imun is a bioinformation product containing pure resin from a tree called Croton lechleri, also known as Sangre de Drago ("dragon's blood").

Drags Imun may act against a variety of infectious and inflammatory diseases. It may help with wound healing and may boost the immune system.

Bioinformation comprises frequencies which simulate the control impulses of subcortical brain structures, which regulate the autonomic nervous system and the function of viscera. Bioinformation acts to offset negative information and induce a reverse regenerative process.

Various Croton tree species secrete a dark red foaming sap. The foaminess is caused by the saponins in the sap. The most commonly cited species is Croton lechleri Muell. Arg. It is a typical representative of the species and produces a ruby-colored sap which is contained in Drags Imun. This tree, which belongs to the Euphorbiaceae family, is native to the rain forests of Central and South America. Its bark, leaves, branches and especially the resin, which has been used in Latin American traditional health practices in various ways for centuries, are used in phytotherapy.

It may be applied orally, rectally, vaginally, and topically to target a broad spectrum of diseases. For instance, it may help stop bleeding, accelerate wound healing and closing, and protect wounds against infections. The sap dries quickly and forms a secondary protective layer. In native health practices, it is often administered to treat dysentery, enteroides, stomach ulcers, hemorrhoids as well as to stop bleeding after childbirth and for vaginal baths before delivery, skin complaints and to relieve itching after insect bites.

Effects of Drags Imun

The resin from Croton lechleri has been the subject of recent intensive scientific research. It contains a multitude of antioxidants (proanthocyanidins), the alkaloid taspine, tannin and other substances, which are the sources of its exceptional properties. A number of pharmacological effects of latex and its ingredients have been demonstrated: anesthetic, antiallergic, antibacterial, antiviral, antioxidant, antiseptic, hemostatic, healing, immunomodulatory, anticancer, antimycotic, antidiarrheal, antiinflammatory, toning, aphrodisiac and antistress. It is a long list which shows that everyone should keep "dragon's blood" on hand as an alternative form of first aid.

Thanks to its properties, Drags Imun has a vast range of indications, and is intended both for internal and external usage. It has proven very useful for healing of wounds, tissues and skin, canker sores, ulcers and inflammatory conditions, particularly in the mouth, larynx, pharynx and elsewhere. It may enhance the body's regeneration and defense system, boost immunity and have a favorable effect on respiratory, flu-like diseases and illness with fever. It has also shown positive antiinflammatory effects on intestinal diseases such as Crohn's disease and ulcerative colitis.

Energy effects of Drags Imun according to TCM principles

Drags Imun may harmonize mainly the energy meridians of the spleen, stomach, three burners (triple energizer), large and small intestine.

Usage of Drags Imun

- Respiratory diseases caused by flu A and B viruses, adenoviruses, retroviruses and parainfluenza viruses
- Hepatitis A and B
- Cold sores caused by herpes viruses, cytomegalovirus-induced diseases (infectious mononucleosis)
- Treatment of superficial wounds (incl. minor wounds as well as venous ulcers) and hemorrhoids
- Healing of skin, canker sores, ulcers and inflammatory conditions, particularly in the mouth, larynx, pharynx and elsewhere
- Supplement for treatment of gastric and duodenal ulcers, digestive complaints caused by *Helicobacter pylori* bacteria, Crohn's disease, and ulcerative colitis
- Stimulation of spleen, pancreas and thyroid gland functions
- Support for the body's defense system
- Intestinal detoxification and diarrhea (*E. coli*, *Enterobacter*, *Salmonella*)
- Bone marrow activation, blood cell regeneration in case of anemia and leukemia
- Improvement of bone and joint quality (arthrosis, arthritis)
- Periodontal disease, bleeding gums, advanced tooth decay
- Multiple sclerosis and Parkinson's disease, protective effect on the CNS
- Boost of energy in case of fatigue and exhaustion
- Anticancer treatment supplement

Composition of Drags Imun

100% natural resin from *Croton lechleri*. Free from preservatives.

Recommended dosage

Drags Imun may be used internally and/or externally. Shake well before use.

Internal use: Adults max. 10 drops 1–3 times per day (0.5 ml), children max. 1 drop 1–3 times per day per 10 kg of body weight. Take with water. Always make a week-long break after 3 weeks of use.

Do not exceed the recommended daily dosage.

We recommend increasing fluid intake during use of the product.

External use: Apply directly on the wound.

3–5 drops diluted in a glass of water may be used as a gargle. In cases of gum disease, it may be applied directly on a toothbrush.

Warning: The product is not intended for use by children under 3 years, pregnant and breast-feeding women. Drags Imun should not be co-administered with medicines suppressing the immune response (immunosuppressants). Dietary supplements are not intended to replace a varied diet.

Storage: Store in a dry place, out of direct sunlight, between 10°C and 25°C. Protect from frost. Keep out of reach of children.
