

Grepofit

- VIRAL AND BACTERIAL INFECTIONS (FLU, STREP THROAT, RHINITIS, ETC.)
- URINARY TRACT INFECTION
- GYNECOLOGICAL PROBLEMS – INFLAMMATIONS, DISCHARGE
- DIGESTIVE AND INTESTINAL COMPLAINTS, ULCERS, AND INFLAMMATIONS
- MYCOSES

This product is approved as a dietary supplement. It is not a medicine and should not be confused with prescribed medicines, nor does it have approved medicinal effects.

Grepofit is a bioinformation product containing a balanced combination of the most potent antimicrobial natural substances. It contains grapefruit seed, echinacea and roselle extracts and sage essential oil.

Grepofit may have antiviral, antibacterial and antimycotic effects.

Bioinformation comprises frequencies which simulate the control impulses of subcortical brain structures, which regulate the autonomic nervous system and the function of viscera. Bioinformation acts to offset negative information and induce a reverse regenerative process.

Effects and usage of Grepofit

- May strengthen overall immunity and detoxify the body
- May act against a broad spectrum of viruses, bacteria and mycoses and is especially suitable in the acute stage of infection, may activate immunity and shorten disease duration
- May help treat respiratory tract diseases – runny nose, upper respiratory tract catarrh, flu, viruses, strep throat, nasopharyngitis, cough, rhonchus, sinusitis, tonsillitis, and middle ear infections
- May act against canker sores, cold sores, and cracking corners of the mouth
- May decrease gum bleeding and reduce mouth odor and heartburn
- May help treat stomach and duodenal ulcers and gastric mucosa inflammation caused by *Helicobacter pylori*
- May be suitable as a treatment for intestinal infections (Crohn's disease, ulcerative colitis), diarrhea and flatulence
- May act against intestinal parasites, may kill *Chlamydia* and *Borrelia*
- May be effective in the treatment of urological infections (urinary bladder, urinary tract, and prostate) and gynecological infections (infections, discharge, *Candida* infection)
- May improve poorly healing wounds and ulcers
- May suppress internal and superficial mycosis development
- May help protect the vascular system and supplement the treatment of phlebitis, hemorrhoids, varicose veins, and varicose ulcers
- May improve the quality of vascular walls and prevent capillary fragility

Energy effects of Grepofit according to TCM principles

Grepofit may harmonize energy meridians, mainly of the spleen, lungs, liver, pericardium and three burners (triple energizer).

Composition of Grepofit

Grapefruit seed extract: In 1980, a substance with an antibiotic effect was identified in grapefruit seeds. This fundamental extract substance may have strong antibiotic effects which prevent bacterial, viral and fungal growth. Along with this substance, the high content of bioflavonoids in grapefruit seed extract also contributes to its potency. Natural bioflavonoids may facilitate digestion, cleanse the body, support immunity, help prevent colds, infections and inflammation, help improve blood circulation and enhance mucosal immunity. They may have antioxidant properties, capture free oxygen radicals, improve the quality of vascular walls, and prevent increased vascular wall fragility, especially in capillaries. They may also prevent the agglutination of platelets and formation of blood clots, thus effectively acting in the prevention of thrombosis and myocardial infarction. This dual-action mechanism means that the two components complement each other and benefit the body.

Grapefruit seed extract may boost the immune system and act selectively, to avoid impairing beneficial gut flora; therefore, unlike synthetic antibiotics, the extract has no undesirable adverse effects. The effect of grapefruit seed extract on mycoses is worth noting – the bioflavonoids and ascorbic acid in this extract prevent mycotic proliferation.

Echinacea purpurea: When applied topically, it may heal various wounds, but it may have a more significant effect when used internally to increase the body's nonspecific immunity. It may boost immunity not only by activating macrophages which are able to eliminate infection-causing agents directly in the body, but also by supporting the production of interferon, an agent preventing viral multiplication in cells.

Roselle: The overall effects of the herb may be antiinflammatory and disinfectant, particularly in the gastrointestinal and urinary tracts. Roselle extract may disinfect the urinary tract and kidneys, facilitate dissolution of some types of urinary stones, have a diuretic effect and alleviate swelling. The disinfectant antibiotic properties may affect all common pathogenic bacterial strains, and in higher doses also parasites. The anthocyanin plant pigments and flavonoids together with vitamin C capture free radicals, slowing the aging process and cellular damage. The extract may generally refresh the body, reduce high blood pressure without any side effects and effectively lower fever.

Sage: Sage oil may have antiviral, antiinflammatory, astringent, bactericidal and disinfectant effects. It is often used in gynecology, particularly for treating complaints at the beginning of menses and during menopause. Its antibiotic effect is employed in the treatment of urinary tract infections, sore throat, strep throat, and gynecological and gastrointestinal tract inflammations.

Recommended dosage

2–2–1 capsule(s) per day. In acute cases, Grepofit may be used every hour, up to a maximum of 9 capsules per day.

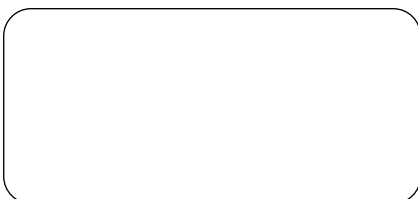

Do not exceed the recommended daily dose! You should always make a week-long break after 3 weeks of use.

We recommend increasing fluid intake during use of the product.

Warning: The product is not intended for children under 3 years or for people with a hypersensitivity to bee or soy products. If you are pregnant or breast-feeding, consult use with your physician. Dietary supplements are not intended to replace a varied diet.

Storage: Keep out of reach of children. Store in a closed container in a dry place, out of direct sunlight, between 10°C and 25°C. Protect from frost.
